

TOP RAIL OPTIONS

STANDARD TOP RAIL

Standard top rail will be installed on the perimeter of your pool that will not be connected to any decking.

DECK MOUNT TOP RAIL

Deck mount top rail will have an extra rim cut into the side, allowing you to easily connect decking straight into the top rail for a seamless look.

WHAT IS THE TOP RAIL?

The top rail of the semi-inground pool is necessary to provide a safe environment for the homeowner. The top rail covers the pre-cut steel walls which may have sharp edges that could lead to injury if not covered appropriately.

HOW MUCH DO I ORDER?

It depends how much decking you plan to incorporate around your pool. Some homeowners choose to have decking completely surrounding their pool, in which case you would get full deck mount top rail and no standard top rail. Some homeowner want half decking and half open, while others have no decking around their pool. Depending on the finished look you choose will determine the amounts of decking you order.

Top rail comes in 8' sections. You will need to look at the perimeter of your pool (provided within each product on the CoolPools.com shop page), and then determine how much of each top rail you want to order.

For example, if you are buying an 18'x36' rectangle semi-inground pool the perimeter is 108'. If you plan on doing about 40' of decking, you will select 40' deck mount top rail and 72' standard top rail. You always want to order over the amount needed since it's difficult to get the exact amount of top rail needed. The CoolPools.com Independent Contractor completing your installation will trim the top rail to ensure a perfect fit.
